EnergyWave energywave.ai • Series A readiness — what must exist before a priced round after Gate 3

15 October 2026 · DD-2026-10-15-r5.4-draft

CONFIDENTIAL — DRAFT — FOR DISCUSSION · AN OUTLINE, NOT AN OFFERING

Series A is a Gate-3 event. What exists for it today, and what does not.

In the program's own design a priced Series A follows Gate 3: independently validated, repeatable performance under third-party observation, and the first number EnergyWave would ever state. The raise model's 36-month horizon ends there. This outline lists what a Series A diligence reader will expect to find, marks what exists, and tags what the founder must supply.

1 · WHERE SERIES A SITS IN THE LADDER

Round	Reached when	Status in this package
Capital Readiness	Now — $60,000 SAFE, 3 months	Deck, one-pager, Terms and Objectives, SAFE term summary (terms open). DRAFTED
Seed	At capital readiness — entity formed, IP position filed, first module reviewed, criteria written	Structure, deck and one-pager drafted; amount and terms tagged open. DRAFTED
Series A	After Gate 3 — third-party validation and the first performance disclosure	This outline; the corrected raise model; the reading note. Cap table and Series A deck not located. OPEN

2 · WHAT THE MODEL SAYS ABOUT THE CAPITAL A SERIES A WOULD FOLLOW

Figure	Stored value (Base scenario)	Origin
36-month plan spend	$17,073,008	Raise Model v1.1-corrected, saved Base-scenario results (UseOfFunds!C4, C6, D24:D26); **model outputs on placeholder inputs**, not validated, not a raise figure. The two theoretical-physicist agreements are modelled at $500k per year each and may be $500k in total.
Raise including 20 % reserve	$20,487,610	
Cumulative need at Gate 1 · Gate 2 · Gate 3 (months 9 · 21 · 36)	$6,573,330 · $12,753,010 · $20,487,610	
Headcount in the plan	18 roles, five of them applied physicists	
Model v2 (11 Sept 2026)	$19.68M base · $23.40M with the full engineering band	Financial_Status_2026-09-18; the v2 file is not located.
Cap table v1.1 DRAFT (11 Sept 2026)	Founder ≈ 29.5 % fully diluted after Series A	Financial_Status_2026-09-18; placeholder inputs; the file is not located.

3 · READINESS CHECKLIST

Item a Series A reader expects	Exists?	What closes it
Gate 1, 2 and 3 reports, certified and published	NO	The research program; years away by the model's own timeline.
Third-party validation of a repeatable result	NO	Gate 3 deliverable.

Item a Series A reader expects	Exists?	What closes it
Cap table (v1.1 DRAFT referenced)	NOT LOCATED	**[Needs Input from Ian or Chip: the cap table file, or confirmation it must be rebuilt from the model]**
Series A deck (13 slides, 11 Sept 2026, referenced)	NOT LOCATED	**[Needs Input from Ian or Chip: the deck file, or confirmation it must be rebuilt]**
Raise model with validated inputs	PARTIAL	Every placeholder validated by finance: founder salary, engineer bases, rent, build-out, instrumentation, additive-manufacturing system, insurance, recruiting; the $500k-each question. **[Needs Input from Ian or Chip: validated inputs, or a finance owner]**
Historical financial statements	NO	None exist for an entity not yet formed; McLean Capital Development LLC's records if it is the operating vehicle. **[Needs Input from Ian or Chip: which entity's books]**
IP assigned to EnergyWave, Inc.	NO	Formation; counsel's assignment of domain and know-how; a filed application in the inventors' names assigned to the company; the ALG question answered.
Board, advisory board, 409A, option plan	NO	Counsel question list (Legal page §5); the external scientific advisory board with a declared critic.
Data-room index	PARTIAL	The workbook's DD_Checklist (37 items, Have / In progress / Need / Blocked) and this package's manifest.

4 · WHAT THIS FOLDER WILL HOLD WHEN THE INPUTS ARRIVE

- The cap table, or a rebuilt one from the model, with every ownership figure labelled placeholder until formation documents exist.
- A Series A deck in the Oct-13 visual system, built only after Gate 2 has said what the effect is — the prospectus' own rule for Gate 3 content.
- The validated raise model and a dated financial-status note replacing the 18 Sept 2026 one.
