Energy Wave

energywave.ai • Capital-Readiness Summary — The power supply for humanoid robots

CONFIDENTIAL — DRAFT — FOR DISCUSSION

ONE IMPORTANT TRUTH

"What important truth do very few people agree with you on?" (Zero to One). Ours: **the last forty years compounded bits, not watts — and the inflection point to the physical-world future is energy density at the point of use.** Look around: the world software built is everywhere; the world it was supposed to power is not. EnergyWave exists to determine whether the next step in portable power is physically achievable — and to own the IP if it is. ***The objective is not to prove a theory. It is to discover whether reality supports one.***

THE VENTURE

EnergyWave builds one thing: the power supply for humanoid robots — the load of human-grade sensing and motion exceeds what lithium-ion delivers. The first research module under test is Floyd "Sparky" Sweet's solid-state design (the vacuum triode amplifier): we will characterize it against the energy-conservation test — net source, colder sink — and either extract the physics or retire it publicly. Two arms: **EnergyWave, Inc.** (Delaware C-corp), the operating company; and a **501(c)(3) in formation**, the policy arm that makes the safety and competitiveness case to government. Safety is a design requirement: the unit is scoped to humanoids only — not to disrupt the auto industry — keyed to its platform like a cartridge, and self-disables into an inert form if tampered with.

THE RAISE

Capital readiness — 3 months — SAFE. Stands up both entities, secures the IP position, and funds the founder full-time; structured to pursue strategic investment from In-Q-Tel. Not a seed round.

Use of Funds (3 months)	Purpose	Amount
Entity formation & legal	*C-corp + 501(c)(3) setup*	$4,000
IP / patent counsel retainer	*K&L Gates — provisional filings*	$25,000
Founder runway	*3 months, full-time*	$24,000
Reserve & travel	*Investor / advisor meetings*	$7,000
Total	**Capital-readiness round**	**$60,000**

Estimated allocation — confirm IP retainer and founder runway with counsel.

THREE-MONTH OBJECTIVES

- **Form both entities** and establish the IP strategy with K&L Gates; file initial provisional protection.
- **Complete the technical review of the Sweet module** and define the humanoid power-budget specification.
- **Define measurable go / no-go criteria** and prepare the next round.

TEAM & COUNSEL

- **Ian McLean — Founder & CEO.** Founded Statpedia (Reddit front page; hundreds of thousands of users); FDIC (2008 crisis); M.S. Computer Science, UC Irvine (quantum coursework); Wolfram Research; venture technology at Avnet — early Anduril and Wrap (NASDAQ: WRAP); founder, McLean Companies LLC. DoD white paper author; NDA consulting for a U.S. intelligence organization.
- **Kenneth "Chip" Story — Co-Founder.** Physicist. M.S. geophysics (Colorado School of Mines); B.S. geological engineering (South Dakota Mines); 50+ years in energy exploration; published researcher. Director & R&T Team Leader, Zero Point Energy Project Group (80 technical minds, five subsets).
- **Jack Sarfatti — Physics advisor.** Theoretical physicist. B.A. physics, Cornell — studied under Hans Bethe, Nobel laureate and head of theory for the Manhattan Project; Ph.D. physics, UC Riverside. Research fellow at Birkbeck College London with David Bohm, and at the ICTP Trieste with Abdus Salam. Leading member of the Fundamental Fysiks Group, credited in the lineage of quantum information science.
- **Alan Crunkleton — Technical & financial advisor.** MIT Ph.D. (mech. eng.); spun his MIT research into a cryogenics company for MRI and superconducting electronics — CEO eight years, through acquisition. M.D., UMass. Partner, Hardesty, LLC; 35+ years, concept to commercialization.
- **Patent counsel — K&L Gates LLP.** Brian Novak, Ph.D., Partner in Charge, Irvine office; and Dennis Majewski, Partner — advanced degree in electrical & computer engineering, former senior electrical design engineer (semiconductors, quantum circuits, micro sensors).

Structure: SAFE (terms / cap set with counsel). **Contact:** Ian McLean · ian@energywave.ai · 949-280-0936

Early-stage research venture. Forward-looking statements are not proven capabilities or guarantees. For discussion only; not an offer to sell securities.
