Energy Wave

CONFIDENTIAL — FORECAST — FOR DISCUSSION

How to read these materials. What is established, what is projected, and in what order.

EnergyWave is an early-stage research venture. These materials are built so that a careful reader can tell, on every page, which statements rest on documents, which are attributed published results, and which are projections of the company's forecast model. Nothing here claims that a device exists, works, or will work.

THE ONE RULE THAT GOVERNS EVERY PAGE

> **Two questions.** Every claim the company examines must answer both: *what is the net energy source — and where is the colder sink?* A claim that cannot answer them is documented and set down. The mainstream prior on the underlying physics is "no", and the program is designed to find that out cheaply and publish it either way.

HOW STATEMENTS ARE LABELLED

Label	Meaning
Established · attributed	A published, peer-reviewed or manufacturer figure, cited to its source. Never an EnergyWave measurement.
Projected	An output of the company's forecast model (v1.2, 16 October 2026) on stated assumptions — a forecast, not a commitment.
Planned	A step the company intends to take — formation, a hire, a lease, an application — stated as a plan, with the condition that triggers it.
Set with counsel	A term, structure or filing finalized with K&L Gates LLP.
Historical	An earlier document retained unedited for provenance; where it conflicts with a later document, the later one governs.

ROUNDS AND AUDIENCES

Round	Audience
Capital Readiness	Close friends, family and angel investment groups; may be combined with the Seed Round (structure set with counsel).
Seed Round	Institutional seed investors — example: Conviction.
Series A	Growth investors — example: groups such as Sequoia Capital.
Government and national security	IQT (In-Q-Tel, Inc. — a strategic-investment platform, not a grant program), DOE, DoW, DARPA.

Every name above is a target audience — not a relationship, endorsement, commitment, invitation or confirmed open opportunity. The exact opportunity, recipient and format are defined at the time of each approach. Nothing in these materials is addressed to any of them.

READING ORDER — INVESTORS

#	Document	What it answers
1	EnergyWave_Deck_2026-10-13.pdf (13 slides) — Capital Readiness	The thesis, the problem, the first research module, the structure, the ask, the team.
2	EnergyWave_OnePager_2026-10-13.pdf — Capital Readiness	The same on one page.
3	Claims Discipline	How every number and every third-party result is labelled.
4	Capital Readiness — Terms and Objectives · Indicative SAFE Terms	The bridge round: what the October materials proposed, what is set with counsel at close, and the indicative instrument.
5	Research Program and Gates (Technical Package)	The gate protocol, the research threads, the eight commitments.
6	Team and Counsel	The people, with the lines the company prints for each.
7	Corporate, IP and Legal Status	The entities, the IP position, the work with counsel.
8	Seed Deck (16 slides), Seed One-Pager, Seed Round Structure and Seed Round Technical Docs (Seed Round); Series A Readiness Outline, the Forecast Model and its Reading Note (Series A)	The rounds the bridge is designed to reach, with the forecast model's projected sizing and the technical hub for the seed round.

READING ORDER — DEPARTMENT OF WAR REVIEWERS

#	Document	What it answers
1	Applicant and Eligibility Facts	Who the applicant of record is, and each eligibility fact with its evidence or plan.
2	xTech Search 10 Submission Summary	What was submitted to xTech Search 10, and when.
3	McLean Capital Development LLC_xTech_Search10_White_Paper.pdf	The three-page competition paper as approved by the founder.
4	Compartmentalization & Anti-Tamper Posture v0.1	How know-how and any future hardware would be protected — CPI / AT vocabulary, pre-device.
5	Energy at the Point of Use — v2.1	The bottleneck, the defense case, the program, the control and safety architecture, the ask.
6	Safe Release Posture	If a high-density power source ever exists, how it ships: control and safety architecture, negative scope, a release roadmap contingent on the gates.
7	Technical Package and the investor core	Shared material: the research program, the technical plans, the team, the corporate status.

WHERE THINGS STAND, STATED FIRST

- **Entity status.** EnergyWave, Inc. is being formed as a Delaware C corporation by K&L Gates LLP. The xTech Search 10 entry was made by McLean Capital Development LLC (Wyoming), the founder's wholly owned company. No SAFE has been executed and no outside funding has been raised.

- **People.** Bios are as carried on the October deck; the company prints only lines it can support, and describes its advisor by his publicly documented line. The current core team is Ian McLean and Chip Story (Co-Founder, Physicist); Jack Sarfatti and Mike Wentz are team members; Alan Crunkleton is an advisor; Arath Acosta is a planned Design Engineer from the Seed Round.
- **Which research module is first.** Sweet solid-state is the lead research path; the independent replication and the measurement platform are distinct threads under one protocol; the specimen, bench order and measurement lead are set at kickoff.
- **Positioning.** The October 2026 deck names the first module and the advisors and uses the line “the power supply for humanoid robots”; that is the company’s approved positioning, and the evidence standards in *Claims Discipline* apply to every statement.

Basis: the 13 October 2026 deck and one-pager; the documents listed above; the company’s forecast model v1.2 (16 October 2026). Contact for these materials: ian@energywave.ai.
