Energy Wave

energywave.ai • Open Items Register — the founder's decisions as applied, every **[TBD]** field, every pending item
15 October 2026 · DD-2026-10-16-r6-draft

CONFIDENTIAL — DRAFT — FOR DISCUSSION · 37 OPEN ITEMS · 14 FOUNDER DECISIONS APPLIED · NO QUESTION IS ASKED OF THE FOUNDER

What was decided, what is [TBD], what is pending. Who holds each item, and where it lands.

On 15 October 2026 the founder gave his decisions (ledger S-44, S-46, S-47), asked that unresolved fields be marked with the exact bracketed **[TBD]** in orange ink, and asked that no further questionnaire follow. This register therefore asks the founder nothing. It records, in order: the one time-critical action; the founder's decisions as applied (closed); every **[TBD]** marker by document, exactly as it appears; every **[Pending: …]** item owed by counsel or a named person; the holds; and the reviewer and lead operations. **[TBD]** identifies an unresolved field and establishes no term, result, agreement or submission clearance. A marker that is not listed here is a finding. The same list is kept as **NEEDS_INPUT.md** at the root of the package (file name kept for continuity).

> **One item is time-critical:** T-1, the xTech Search 10 attachment, before Monday 19 October 2026, 21:00 UTC. Everything else is gated by circulation, not by a clock.

0 · TIME-CRITICAL — BEFORE MONDAY 19 OCTOBER 2026, 21:00 UTC (2:00 PM PACIFIC)

The xTech Search 10 portal is editable until the close. This is an action on the checklist, not a question.

#	Item	Where it lands	Who
T-1	Verify the current xTech attachment (artifact 262231) before the close: download it, hash it (expected 90823d62…fea1, 123,643 bytes), confirm the cover reads ≈ USD 10,000 under Capital Raised Total — the 9 Oct record as submitted, which the 15 Oct no-funding statement does not change — with no private-review banner and none of the six blank cover fields; re-upload the approved replacement if not. Record the hash and time seen; who applied the 9–14 Oct changes, whether Beacon/Muse made the submission and whether the evaluators' frozen version is known stay **[TBD]** unless noted. Nothing on the portal is changed by this package.	90_Internal_Ops_NOT_FOR_CIRCULATION/2026-10-15_xtech-attachment-verification_checklist.md; D7; xTech Submission Record §3 and §5	Ian (an action, not a question)

A · THE FOUNDER'S DECISIONS OF 15 OCTOBER 2026 — APPLIED AND CLOSED (LEDGER S-44, S-46, S-47)

Founder statements and authoring directions relayed by GPT; not independent bank, registry, contractual, institutional or recipient verification. Each row names where it was applied and what stays **[TBD]**.

#	Item	Where it lands	Who
F01	Audiences: Capital Readiness for close friends, family and angel investment groups, may combine with the Seed Round; Conviction the Seed example; Sequoia the Series A example; IQT, DOE, DoW, DARPA the government and national-security targets — targets, not relationships. The three round folders stand; the Capital Readiness deck is not relabelled. Still **[TBD]**: the combined-round structure, the exact opportunity, recipient and format.	D1; Capital Readiness Terms; Series A outline §1; Reading Guide; DELIVERY_MAP.md	closed (founder)
F02	No SAFE executed (“correct no safe has been done”); no funding raised. The prior-SAFE question is closed. Still **[TBD]**: the accounting basis reconciling the 9 Oct ≈ $10,000 record; the workbook's E10 / P4 entries stay as dated conflicts.	D3; SAFE Term Summary; Capital Readiness Terms; Seed deck slide 5 and one-pager; Legal page; Applicant page; xTech record §5; Raise Model Note status box	closed (founder)
F03	Amounts, instrument and budgets: no numeric target supplied (“sky is the limit” sets no number); a future SAFE possible, not selected. **[TBD]**: amount, tranche sizes, instrument, cap / valuation / discount / MFN, budget owner, allocation; the Oct-13 $60,000 and the model's outputs stay dated proposals and scenarios.	every investor page (B-1, B-2, B-3, B-13)	closed (founder); fields **[TBD]**
F04	Entity work: K&L Gates is handling the entity (founder) — a responsibility, not formation evidence. Certificate, file number, officer and share details are pending from counsel (C-2).	D3; Legal page §1 and §5; Capital Readiness Terms; SAFE page; deck slides 5 and 14; one-pager; DoW v2.1 §5; Safe Release §8; Applicant page; counsel draft §A	closed (founder); counsel pending
F05	First research path: Sweet solid-state leads. Replication (B) and metrology (C) stay distinct; xTech's proposal is not rewritten. **[TBD]**: specimen, conditioning, website-device identity, bench order, laboratory, named measurement lead (B-4, B-16).	D2; Research Program; deck slide 6; one-pager; structure page; Thread A plan; Technical Docs hub; DoW v2.1 §3.2	closed (founder); fields **[TBD]**
F06	Planned office: the UCI area near the National Fuel Cell Research Center, where the founder says ACT Hydrogen works — a plan. **[TBD]**: address, lease, space, price, laboratory access, any agreement (B-12). No lease, facility access, sponsored research, partnership, endorsement or institutional agreement with UCI, the NFCRC or ACT Hydrogen is established in the reviewed evidence; the plan implies none.	D12; deck slide 9; one-pager; structure page; Technical Docs hub; Applicant page; Raise Model Note status box	closed (founder); fields **[TBD]**
F07	Current core team: Ian McLean and Chip Story; Chip “cofounder Physicist” by the founder's designation (S-47), not credential proof. **[TBD]**: compensation, equity, vesting and agreements — counsel's lane.	D4; Team page roster; deck slide 11; one-pager; DoW v2.1 §6; Safe Release §8	closed (founder)

#	Item	Where it lands	Who
F08	Team additions: Mike Wentz — on the team by the founder's direct direction of 16 Oct 2026 (S-55), superseding the 15 Oct after-Capital-Readiness plan; title **[TBD]**; credentials unverified; consent pending, no outreach authorized. Arath Acosta — proposed Design Engineer from Seed onward (planned). **[TBD]**: other roles, terms, start, credentials; no age, praise, invented qualification, employment or signed hire.	D4; Team page roster; deck slide 11; one-pager; DoW v2.1 §6; Safe Release §8; Raise Model Note status box	closed (founder); fields **[TBD]**
F09	Roles confirmed (S-46): Alan Crunkleton — advisor; Jack Sarfatti — team member, not advisor ("Jack has consented as team member not advisor"); consent confirmed by the founder for both (founder-reported; no signed instrument claimed); supersedes the handoff's "both advisors" wording; historical records unchanged; not asked again. 16 Oct 2026 (S-56): the founder's own outreach has happened — "they are good with the positions as they are … Jack has stated he is willing and also Alan as said yes to being my advisor"; willingness and role consent confirmed; the initial willingness / role-consent outreach item is closed; not a signed agreement; no compensation, IP or employment terms; role wording unchanged. **[TBD]**: Crunkleton's three bio items.	D4; Team page; deck slide 11; one-pager; DoW v2.1 §6; Safe Release §8; the two held drafts	closed (founder)
F10	Contact: ian@energywave.ai fully configured in Outlook (founder report); the forwarding / Send-As question is retired; the prepared signature reported saved and verified in Outlook by GPT. No send or delivery test. **[TBD]**: the letterhead address (B-8).	D5; DoW v2.1 header; Safe Release letterhead; drafts' From lines; internal-ops README	closed (founder)
F11	No assistant outreach to Alan Crunkleton or Jack Sarfatti: the 15 Oct HOLD barred it, and on 16 Oct the founder confirmed that his own outreach has happened (S-56) — the founder is not asked again, no consent-request email is sent, no new outreach; their drafts preserved unsent as records; earlier Grok reviews are dated records of exact drafts, not send authority; no address lookup.	H-1, H-2; internal-ops README; Team page; Seed deck and one-pager	standing instruction
F13	Series A updated as directed (16 Oct 2026, S-55, S-57: "Please update the Series A accordingly", read with "Doesn't it make sense to have him at five hundred k W2?"): the dated derivative EnergyWave_Raise_Model_v1.2_2026-10-16.xlsx carries Chip Story's row at $500,000 W-2 (payroll load applied; status From Ian, interpretation flagged), a Mike Wentz note (not modeled), a README change record; recalculated in full; v1.1-corrected untouched. Base effect: plan $18,453,008; raise $22,143,610; gates $6,987,330 / $13,719,010 / $22,143,610 — model outputs on placeholder inputs. **[TBD]**: whether Chip's agreement is one of the two $500k physicist agreements or additional; his time commitment and cash / equity split; Mike Wentz's title, type, base and start in the model.	Series A folder (v1.2 workbook, README); Raise Model Note; Series A outline §2a; deck slides 8–9; one-pager; D8; ledger §E	closed (founder); fields **[TBD]**

#	Item	Where it lands	Who
F14	EnergyWave Final is the living presentation link (16 Oct 2026, S-58; D13): the collection is rebuilt from the sources on every pin (src/build/build_final.py) in projected language — what is projected (the forecast model v1.2), planned or set with counsel — with no marker, tag, source block, reviewer name or internal reference; the orange **[TBD]** / [Pending] regime governs the internal package only; the Delaware C corporation is stated as in formation with K&L Gates (founder's statement). A projection never resolves a fact the internal page leaves open. GPT/Lyra installs the tree into the nine collection folders and moves the Review Records and the r4.1 snapshot out of the shared link. Sending the link is the founder's action; counsel's 506(b)/(c) answer (C-1) governs whether it may reach anyone the company has not spoken with — put to the founder once, not re-raised.	EnergyWave_Final/; DELIVERY_MAP.md; mirror instructions §7; README Rule 12; REVIEW_PROTOCOL item 8; D13	closed (founder); installation GPT/Lyra
F12	Keep the format and other content as they are; no more questions; mark unresolved fields with the exact bracketed **[TBD]** in orange ink (“make the TBD in brackets [TBD] and in orange ink”, superseding the earlier marker wording). **[TBD]** is not resolved, signed or verified; originals, dated quotes, historical figures, scientific thresholds and hashes are preserved.	every page; this register; README Rule 11; REVIEW_PROTOCOL item 7; D8, D10, D11 marked **[TBD]**	closed (founder)

B · [TBD] FIELDS, BY DOCUMENT — THE LITERAL MARKERS, WHERE EACH ONE SITS

[TBD] — the exact bracketed marker in orange ink, as the founder asked on 15 Oct 2026 — stands for a current amount, term, role or detail not yet determined. It identifies an unresolved field; it establishes no term, result, agreement or submission clearance; and no further question is asked of the founder about it. He fills these in his own time.

#	Item	Where it lands	Who
B-13	**[TBD] · [TBD] — amount · [TBD] — instrument · [TBD] — cap, discount, MFN · [TBD] — combined structure · [TBD] — reconciliation of the 9 Oct ≈ $10,000 record with the 15 Oct no-funding statement**	01_Investor/01_Capital_Readiness/EnergyWave_Capital_Readiness_Terms_and_Objectives_2026-10-15.pdf	the founder, in his own time, with counsel
B-1	**[TBD] · [TBD] — instrument · [TBD] — SAFE form · [TBD] — current amount · [TBD] — valuation cap · [TBD] — discount · [TBD] — MFN · [TBD] — pro rata side letter · [TBD] — investor(s) and accredited-investor basis · [TBD] — information-rights letter · [TBD] — officer title on formation — counsel’s CEO / Secretary / CFO confirmation pending · [TBD] — reconciliation of the 9 Oct record with the 15 Oct statement**	01_Investor/01_Capital_Readiness/EnergyWave_SAFE_Term_Summary_DRAFT_2026-10-15.pdf	the founder with counsel; counsel for 506(b)/(c)
B-2	**[TBD] · [TBD] — thread A specimen and conditioning · [TBD] — Tranche A amount · [TBD] — Tranche B amount · [TBD] — Tranche C amount · [TBD] — validated inputs; budget owner · [TBD] — role · [TBD] — instrument and pre-money · [TBD] · [TBD] · [TBD] — seed amount, pre-money and instrument · [TBD] — validated inputs; budget owner · [TBD] — office site, lease and laboratory access**	01_Investor/02_Seed_Round/EnergyWave_Seed_Deck_DRAFT_2026-10-15.pdf; 01_Investor/02_Seed_Round/EnergyWave_Seed_OnePager_DRAFT_2026-10-15.pdf; 01_Investor/02_Seed_Round/EnergyWave_Seed_Round_Structure_DRAFT_2026-10-15.pdf	the founder with counsel; counsel for escrow and 506(b)/(c)

#	Item	Where it lands	Who
B-3	[TBD] · [TBD] — Chip Story's agreement: one of the two $500k physicist agreements, or additional to them · [TBD] — Chip Story's time commitment and cash / equity split · [TBD] — Mike Wentz — title, engagement type, base and start month in the model · [TBD] — the cap table file, or rebuild from the model · [TBD] — the Series A deck file, or rebuild · [TBD] — validated inputs; budget owner · [TBD] — which entity's books · [TBD] · [TBD] — Chip Story's agreement: one of the two $500k physicist agreements, or additional to them · [TBD] — Chip Story's time commitment and cash / equity split · [TBD] — Mike Wentz — title, engagement type, base and start month in the model	01_Investor/03_Series_A/EnergyWave_Series_A_Readiness_Outline_DRAFT_2026-10-15.pdf; 01_Investor/03_Series_A/EnergyWave_Raise_Model_Note_2026-10-15.pdf	the founder; a finance owner when named
B-16	[TBD] — specimen and conditioning · [TBD]	03_Technical_Documents/EnergyWave_Research_Program_and_Gates_2026-10-15.pdf	Chip Story with the founder (inventor-defined)
B-4	[TBD] · [TBD] — the actual core — material, grade, supplier, lot; or the off-the-shelf baseline · [TBD] — geometry, magnetization direction and state, winding axis · [TBD] — winding specification if the original design differs · [TBD] — the conditioning procedure, its intended state change and the energy delivered · [TBD] — the founder's notes, drawings and prior measurements for the pre-registration appendix · [TBD] — specimen — material, grade, geometry, magnetization, winding axis · [TBD] — the conditioning procedure and its intended physical state change · [TBD] — the founder's notes and any prior measurements on the module · [TBD] — whether the deck's Sweet module and the website's "mid-1980s solid-state design" are the same device · [TBD] — the measurement lead who signs the specimen record, and the laboratory	03_Technical_Documents/EnergyWave_Thread_A_Characterization_Plan_DRAFT_2026-10-15.pdf	Chip Story with the founder (inventor-defined)
B-5	[TBD] · [TBD] — $\bar{P}$ · [TBD] — $\bar{P}$ from §3 · [TBD] — Ppeak, ramp rate · [TBD] — E · [TBD] — shift length and duty profile · [TBD] — target platform mass and bay volume · [TBD] — allowable heat rejection · [TBD] — target platform — which humanoid, or a generic class	03_Technical_Documents/EnergyWave_Humanoid_Power_Budget_Specification_DRAFT_2026-10-15.pdf	the founder or Chip Story; the PI when hired
B-12	[TBD] · [TBD] — the exact site, laboratory footprint and first two hires — filled from the operating-requirements register when received	01_Investor/02_Seed_Round/EnergyWave_Seed_Round_Technical_Docs_DRAFT_2026-10-15.pdf	filled from GPT/Codex's operating-requirements register; the founder in his own time
B-14	[TBD] — founder and co-founder terms — counsel's lane · [TBD] — role · [TBD] — Design Engineer — credentials, terms, start · [TBD] — other roles and details · [TBD] — degree wording from a diploma or transcript · [TBD] · [TBD] — the three items — confirmed or omitted	05_Team/EnergyWave_Team_and_Counsel_2026-10-15.pdf	the founder ([TBD] fields); Chip; counsel

#	Item	Where it lands	Who
B-7	**[TBD] — issuing entity — the LLC as applicant of record, or EnergyWave, Inc. once formed · [TBD] — exact degree wording from a transcript · [TBD] — the three unverified items — confirmed or omitted · [TBD] — role · [TBD]**	02_DoW/EnergyWave_DoW_White_Paper_v2.1_DRAFT_2026-10-15.pdf	the founder (**[TBD]** fields); Chip; counsel
B-8	**[TBD] — whether the August 2025 paper was sent to any office, investor or advisor, and to whom — a written supersession note follows if it was (D11) · [TBD] · [TBD] — registered or mailing address for EnergyWave letterhead**	02_DoW/EnergyWave_Safe_Release_Posture_DRAFT_2026-10-15.pdf	the founder (**[TBD]** fields); consents pending
B-15	**[TBD] · [TBD] — physical operating location**	02_DoW/EnergyWave_Applicant_and_Eligibility_Facts_2026-10-15.pdf	the founder, in his own time
B-9	**[TBD] · [TBD] — QVE Engine folder — inventoried if and when it reaches the Drive copy or the Mac is connected; not asked again · [TBD] — was this text ever published on energywave.ai or sent to anyone? · [TBD] — status of the Rossi relationship; any payment, deliverable or agreement; whether Rossi has any claim on EnergyWave IP · [TBD] — was this paper sent to any military office, investor or advisor? If yes, to whom and when, so a written supersession note can follow; and the Rossi relationship as in L-09** — Legacy sources — the QVE Engine folder is inventoried if and when it reaches the Drive copy of the Mac collection or the Mac is connected; the Rossi relationship and the 2024 GPT-content text (D11) are **[TBD]** and counsel's lane; SHA-256 of each §F file from the Mac when Antigravity hashes them (R-2).	SOURCE_LEDGER.md §D and §F	**[TBD]**; Antigravity for the hashes
B-10	**[TBD] · [TBD] · [TBD] — proposed terms, or "counsel to propose" · [TBD] — yes / the cap table at formation · [TBD] — names and titles · [TBD] · [TBD] — date; please confirm the filing would be in the inventors' names with later assignment, and what "some app and claim prep" covers. · [TBD] — attach the three documents · [TBD] · [TBD] — is stated on every page that shows a v1.2 figure. · [TBD]** — Internal-ops drafts — Chip's draft asks him for his printed wording, written consent and proposed co-founder terms (or “counsel to propose”); the counsel question set carries the formation and ALG placeholders counsel fills; Alan's and Jack's drafts are overtaken for role consent by the founder's own outreach of 16 Oct (H-1, H-2; S-56) and stay unsent. Every draft goes to Grok for its per-email review before any send; no send is authorized today.	90_Internal_Ops_NOT_FOR_CIRCULATION/	the founder (send authority only); Chip; counsel; Grok (review)
B-11	Mirrors and project — GPT/Lyra places and verifies each reviewed release in the three copies and fills the nine audience folders from DELIVERY_MAP.md after review; Ian or Antigravity uploads manifest.json, MANIFEST.md and the twenty-one rendered documents to the EnergyWave Ops Claude Project (an action, not a question).	2026-10-15_mirror-instructions.md; README release table; DELIVERY_MAP.md	GPT/Lyra; Ian or Antigravity

C · PENDING FROM COUNSEL OR A NAMED PERSON

Evidence, consent or an action owed by someone other than the founder. Drafted question sets are not sent; nothing here authorizes outreach.

#	Item	Where it lands	Who
P-1	**[Pending: counsel — 506(b) or 506(c)]**	01_Investor/01_Capital_Readiness/EnergyWave_SAFE_Term_Summary_DRAFT_2026-10-15.pdf	the founder with counsel; counsel for 506(b)/(c)
P-2	**[Pending: consents — D4]** · **[Pending: counsel — escrow structure]** · **[Pending: counsel — 506(b) or 506(c)]** · **[Pending: consents — D4]** · **[Pending: counsel — escrow structure]** · **[Pending: counsel — 506(b) or 506(c)]**	01_Investor/02_Seed_Round/EnergyWave_Seed_Deck_DRAFT_2026-10-15.pdf; 01_Investor/02_Seed_Round/EnergyWave_Seed_OnePager_DRAFT_2026-10-15.pdf; 01_Investor/02_Seed_Round/EnergyWave_Seed_Round_Structure_DRAFT_2026-10-15.pdf	the founder with counsel; counsel for escrow and 506(b)/(c)
P-14	**[Pending: Mike Wentz — written consent; no outreach authorized]** · **[Pending: counsel — consent to name K&L Gates, Novak and Majewski]** · **[Pending: consents — D4; Chip's written consent and counsel's]**	05_Team/EnergyWave_Team_and_Counsel_2026-10-15.pdf	the founder (**[TBD]** fields); Chip; counsel
P-7	**[Pending: Chip Story — written consent]** · **[Pending: Mike Wentz — written consent; no outreach authorized]** · **[Pending: counsel — consent to be named]**	02_DoW/EnergyWave_DoW_White_Paper_v2.1_DRAFT_2026-10-15.pdf	the founder (**[TBD]** fields); Chip; counsel
P-8	**[Pending: written consents before this paper circulates — D4; Jack's and Alan's roles and willingness founder-confirmed after his own outreach (16 Oct), no signed instrument; no new outreach]**	02_DoW/EnergyWave_Safe_Release_Posture_DRAFT_2026-10-15.pdf	the founder (**[TBD]** fields); consents pending
C-1	Securities: Rule 506(b) or 506(c) for the capital-readiness financing (instrument **[TBD]**; the Oct-13 materials proposed a $60,000 SAFE; none executed) and for the seed round — no deck reaches an investor who has not heard from the company first until answered; escrow structure for Tranches B and C; any CFIUS / FIRRMA consideration.	counsel question set §C; SAFE Term Summary; Seed deck slide 14; structure page	counsel
C-2	Formation: the four confirmations; the 1988 Delaware "EnergyWave Inc." #2149394; the filing itself (K&L Gates handling — founder, 15 Oct), then the certificate and file number.	counsel question set §A; Legal page §1	counsel
C-3	Patent: the current Patent Center docket for 63/763,998 and any later filing; the coversheet provisional in the inventors' names and what "some app and claim prep" covers; the ALG IP Assignment (Exhibit A, blank signature line), the July 2025 NDA and the Integrated Protective Rider reviewed against the EnergyWave work; assignment of energywave.ai and existing work product on formation; a freedom-to-operate note on the Haisch–Moddel / Jovion patents (ledger L-04) and thread B.	counsel question set §B; Legal page §§2–4	counsel

#	Item	Where it lands	Who
C-4	People and naming: consent to name K&L Gates, Novak and Majewski with their exact titles; advisor and team-member agreements; a 409A before any option grant; co-founder terms and the ZPEPG IP boundary.	counsel question set §E; Team and Counsel	counsel
C-5	Security posture: the AT-posture memo's §8 questions (trade-secret program; patent versus trade secret by compartment; Invention Secrecy Act exposure; export classification and deemed exports; CPI / AT obligations under federal funding; NDAs and departure procedures).	counsel question set §F; Compartmentalization & AT Posture v0.1 §8	counsel

D · HOLDS

An express instruction not to act — and, for Alan and Jack, the record that the founder's own outreach has closed the willingness / role-consent item (16 Oct 2026, S-56).

#	Item	Where it lands	Who
H-1	Alan Crunkleton — advisor; role consent confirmed by the founder (S-46) and, on 16 Oct 2026, willingness confirmed by the founder's own outreach (S-56: “Alan as said yes to being my advisor”) — the willingness / role-consent item is closed; no signed instrument; no compensation, IP or employment terms. No assistant outreach: the draft (bio-item confirmation) is overtaken for role consent and preserved unsent, not to be sent as a consent request; the three bio items stay **[TBD]** on the Team page, the founder's to raise in his own time; the r5.3 Grok verdict is a dated record, not send authority; no address lookup.	90_Internal_Ops/2026-10-15_consent-request_alan-crunkleton_DRAFT.md; Team page	no one — closed for consent; the founder, for the **[TBD]** items
H-2	Jack Sarfatti — team member, in his existing role; role consent confirmed by the founder (S-46) and, on 16 Oct 2026, willingness confirmed by the founder's own outreach (S-56: “Jack has stated he is willing”) — the willingness / role-consent item is closed; no signed instrument; no compensation, IP or employment terms. No assistant outreach: his draft is overtaken for role consent and preserved unsent, not to be sent as a consent request; the printed-wording question stays open on the Team page, the founder's to raise in his own time.	90_Internal_Ops/2026-10-15_consent-request_jack-sarfatti_DRAFT.md; Team page	no one — closed for consent; the founder, for the wording

E · FOR THE REVIEWERS (GPT / LYRA, ANTIGRAVITY, GROK, GEMINI / ARGON)

GPT/Lyra audited r5 (S-39), delta-checked r5.2 (S-40), closed r5.3 (S-41), delivered the founder decisions (S-44, S-46, S-56), audited r5.6 (S-48) and accepted and installed r5.7 (S-51, S-54); Antigravity reviewed r5.6 (S-49, read with S-50); each later release gets its own delta check against its pin.

#	Item	Where it lands	Who
R-1	Delta-check this release from the commit and pin in the handoff, per REVIEW_PROTOCOL.md — r5.8 pins the working changes made after r5.7: the Antigravity r5.6 disposition and Claims Discipline §3 wording, the held counsel and Chip drafts corrected per Grok (unsent), the r5.7 installation receipt, Mike Wentz on the team (S-55), the Alan/Jack confirmation (S-56), the Raise Model v1.2 derivative and the Series A update (S-57), the session handoff and the register generator in src/build/; the slide deck is 16:9 with its own footer line on each slide.	REVIEW_PROTOCOL.md	Lyra; Antigravity

#	Item	Where it lands	Who
R-2	Hash the §F legacy files on the Mac and send the list.	SOURCE_LEDGER.md §F; mirror instructions	Antigravity
R-3	Re-review the Chip and counsel drafts if and when the founder authorizes a send — a prior verdict is not clearance of a revised draft; the Alan and Jack drafts are overtaken for role consent (S-56) and stay unsent; verdicts recorded in the folder; none sent.	90_Internal_Ops README	Grok (Architect, Compliance)
R-4	Install EnergyWave_Final/ from the pinned commit into the collection's nine folders by DELIVERY_MAP.md (the Guide at the collection root), hash-checked against MANIFEST.md; move the Review Records and the r4.1 snapshot out of the shared link, unchanged, and verify them where they land; rebuild the collection's FILE_MANIFEST.json; one writer at a time.	DELIVERY_MAP.md; mirror instructions §7	GPT/Lyra
R-5	Antigravity's “fill in the blank audit” from a scientific structure (founder, 16 Oct 2026, S-58): when received, read in full and recorded in the ledger; each proposed fill is a reviewer suggestion, adopted into a page only with a source or the founder's direction — never written into a marker on its own authority.	SOURCE_LEDGER.md §B; the affected pages	Antigravity (audit); Claude (disposition)

F · WHAT THE LEAD CLOSES WITHOUT FURTHER INPUT, ONCE THE INPUTS ARRIVE

Held by the lead; listed so the sequence is visible.

#	Item	Where it lands	Who
E-1	When a **[TBD]** field is filled, a consent arrives or counsel answers: fill the marker, re-render the affected pages, bump the version, rebuild the manifest, commit, push, and hand the new pin to the reviewers.	—	Claude
E-2	Fold GPT/Codex's operating-requirements register into the Technical Docs hub when received (B-12); draft the supersession note if the 2025 paper's distribution is confirmed (D11); draft the Series A files when the cap table and deck are located or rebuilt (B-3); place the QVE Engine inventory in the ledger when reachable (B-9).	—	Claude
E-3	Update DELIVERY_MAP.md whenever a file enters or leaves the collection, in the same commit as the pin.	—	Claude
E-4	Before every pin: python3 src/build/build_final.py (fail-closed), then render, probes, lint, manifest, verify; a new marker in a page source needs its data-proj text in the same edit, or the presentation render refuses.	—	Claude

Sources: the marked pages in src/pages/; DECISIONS.md D1–D12; SOURCE_LEDGER.md §D, §F, S-36–S-58; 90_Internal_Ops_NOT_FOR_CIRCULATION/; DELIVERY_MAP.md; REVIEW_PROTOCOL.md; the founder decisions of 15 Oct 2026 (S-44, S-46, S-47). This register is generated from the markers; a marker that is not here is a finding.
