Energy Wave

CONFIDENTIAL — DRAFT — FOR DISCUSSION · VERIFICATION PENDING — NOT FOR CIRCULATION

Built to be checked, not just believed. Every line, and whether it has been.

The bios below are reproduced verbatim from slide 12 of the deck. Beside each is the state of verification against primary sources and whether the person has consented in writing to be named in that role. Lines marked open do not appear in any circulated version until they close.

ROSTER BY STAGE — THE FOUNDER'S DIRECTION OF 15 OCTOBER 2026 (LEDGER S-44)

Stage	Person · role	Status
Current core team	Ian McLean — Founder & CEO Chip Story — Co-Founder, "cofounder Physicist" (founder's designation, 15 Oct 2026 14:39 PT, S-47)	Founder-directed positioning (15 Oct 2026); the "Physicist" label is a founder role designation, not credential proof; credentials and consents as verified below, not by this direction. Compensation, equity and vesting **[TBD] — founder and co-founder terms — counsel's lane**
Team member	Jack Sarfatti — team member, theoretical physicist	"Jack has consented as team member not advisor" (founder, 15 Oct 2026, S-46) — a team member, not an advisor; no additional title, employment terms, compensation or credentials are supplied by that instruction, which supersedes the same day's "both advisors" direction (S-44). Consent confirmed by the founder (founder-reported; no separate signed instrument is claimed or on file). On 16 Oct 2026 the founder confirmed that his own outreach has happened and that Jack "has stated he is willing" in this role (S-56): the willingness / role-consent item is closed; not asked again; no consent request is sent and no new outreach follows. Not a signed agreement; no compensation, IP or employment terms are established.
Advisor	Alan Crunkleton — technical & financial advisor	Retained as an advisor; consent confirmed by the founder (15 Oct 2026, S-46 — founder-reported; no separate signed instrument is claimed or on file). On 16 Oct 2026 the founder confirmed that his own outreach has happened and that Alan "said yes to being my advisor" (S-56): the willingness / role-consent item is closed; not asked again; his draft stays unsent and no new outreach follows. Not a signed agreement; no compensation, IP or employment terms are established.

Stage	Person · role	Status
Team member (added 16 Oct 2026)	Mike Wentz — team member	The founder's direct direction of 16 Oct 2026 (S-55): "I have Mike Wentz I want to put on the team as well" — supersedes the 15 Oct "willing to join after Capital Readiness" plan. Title **[TBD] — role**; no credential line is printed until the September roster's recorded discrepancy is resolved; no age, praise or invented title. Consent and the wording he wants printed **[Pending: Mike Wentz — written consent; no outreach authorized]**.
Seed Round onward	Arath Acosta — Design Engineer (proposed)	A proposed, founder-directed role from Seed onward — not an executed hire and not a current employee; credentials, terms and start **[TBD] — Design Engineer — credentials, terms, start**.
Other roles	—	**[TBD] — other roles and details**. A founder direction establishes none of credentials, compensation, equity agreements or third-party consent.

IAN MCLEAN — FOUNDER & CEO

> *Founded Statpedia (Reddit front page; hundreds of thousands of users); FDIC (2008 crisis); M.S. CS, UC Irvine (quantum coursework); Wolfram Research; Avnet venture tech — early Anduril, Wrap (NASDAQ: WRAP). DoD white paper author; NDA consulting, U.S. intelligence org.*

Claim	Verification	Status
M.S. Computer Science, UC Irvine (quantum coursework)	The 8 Oct independent review flagged the website's earned-degree claim as unsupported; the September investor overview carries the claim in one variant and omits it in another. Exact wording (conferred vs. coursework; year) **[TBD] — degree wording from a diploma or transcript**.	[TBD]
DoD white paper author	"Energy at the Point of Use", v2.0, August 2026, on McLean Companies LLC letterhead — located, SHA-256 e312c7aa… 825c.	VERIFIED
Statpedia; FDIC (2008); Wolfram Research; Avnet (early Anduril, Wrap); NDA consulting for a U.S. intelligence organization	Stated by the founder; to be supported by dated records before circulation. The DHS NDA is a personal record and stays out of every data room.	OPEN
Sole member, President of McLean Capital Development LLC (Wyoming)	Signed secretary's certificate, 23 June 2026; registry Active (lookup 8 Oct 2026).	VERIFIED

CHIP STORY — CO-FOUNDER

> *Physicist. B.S. geological engineering (South Dakota School of Mines); M.S. geophysics (Colorado School of Mines); 50+ years in energy exploration — published researcher. Director & R&T Team Leader, Zero Point Energy Project Group (80 technical minds, five project subsets).*

Printed as "Kenneth "Chip" Story" on the Oct-13 deck and one-pager and on the ZPEPG leaders page; he goes by Chip Story, and new documents use that name (founder, 15 Oct 2026).

Claim	Verification	Status
Co-Founder	The roster (Sept) records “Co-founder; confirm terms”; a co-founder agreement, vesting and the ZPEPG conflict / IP boundary are not on file — counsel’s lane, not a question for the founder. The xTech portal names him secondary contact and “Co-Founder”; team-member acceptance was not visible at submission.	OPEN
B.S. geological engineering (South Dakota School of Mines); M.S. geophysics (Colorado School of Mines); 50+ years; published researcher	Published by the Zero Point Energy Project Group on its own leaders page, captured directly on 15 Oct 2026 05:14 UTC (S-33): “over 50 years of experience in the oil and gas industry … doing research, publishing papers, and presenting results”, a B.S. in geological engineering from South Dakota School of Mines and an M.S. in geophysics from Colorado School of Mines. The LinkedIn profile the founder points to could not be retrieved (HTTP 999, S-34) and is cited only as founder-pointed, uninspected. An organizational publication — not a registrar record, and not EnergyWave consent.	PARTIAL
“Director & R&T Team Leader, ZPEPG (80 technical minds, five project subsets)”; “Physicist”	The founder wrote and approved the deck line (S-01) and supplied the ZPEPG and LinkedIn pointers (15 Oct). ZPEPG’s captured leaders page (S-33) supports Director, the two degrees and the 50 years; a members-site page says Board Member; the group describes itself as a volunteer 501(c)(3) research consortium with numbered teams. “R&T Team Leader”, the figures 80 and five, and “Physicist” (his training is geological engineering and geophysics) are not on the pages seen and stand as the founder’s own statements; on 15 Oct 2026 (14:39:15 PT, Grok Architect conversation, observed directly by Lyra — S-47) the founder assigned him “cofounder Physicist”, a founder role designation, not credential proof. Nothing further is asked of the founder; the wording Chip wants printed, with his written consent, is asked of him in the consent request.	FOUNDER-STATED

JACK SARFATTI — PHYSICS ADVISOR (AS PRINTED ON THE OCT-13 DECK) · TEAM MEMBER, NOT ADVISOR (FOUNDER, 15 OCT 2026)

> *Theoretical physicist. B.A. physics, Cornell — studied under Hans Bethe, Nobel laureate and head of theory for the Manhattan Project; Ph.D. physics, UC Riverside. Research fellow at Birkbeck College London with David Bohm, and ICTP Trieste with Abdus Salam. Leading member of the Fundamental Fysiks Group, credited in the lineage of quantum information science.*

Claim	Verification	Status
Bio line	Verified 11 Sept 2026 (ledger E2). Wording rule from the roster: “trained under Hans Bethe at Cornell; Ph.D. UC Riverside” — never “Ph.D. under a Nobel laureate”. The deck’s wording complies. He is an on-record skeptic of the premise, which the company treats as a credibility asset.	VERIFIED

Claim	Verification	Status
Title “Physics advisor”	Earlier documents called him co-founder; the deck of 13 Oct says advisor. On 14 Oct 2026 the founder said he is “still a physicist and doesn’t have to state advisor … participates in convo” (S-38). On 15 Oct 2026 the founder first directed that Jack and Alan be kept as advisors (S-44) and corrected it the same day: “Jack has consented as team member not advisor” (S-46) — new documents print “team member — theoretical physicist”, with no further title or terms. The Oct-13 title stays quoted here as the historical record. Consent: confirmed by the founder (founder-reported; no separate signed instrument is claimed or on file); on 16 Oct 2026 the founder’s own outreach confirmed that Jack is willing, in this role (S-56); not asked again; the draft to him stays unsent, and no new outreach follows.	FOUNDER-CONFIRMED

ALAN CRUNKLETON — TECHNICAL & FINANCIAL ADVISOR

> *MIT Ph.D. (mech. eng.); spun MIT research into a cryogenics company for MRI and superconducting electronics — CEO eight years, through acquisition. M.D., UMass. Partner, Hardesty, LLC; 35+ years, concept to commercialization.*

Claim	Verification	Status
Ph.D. Mechanical Engineering, MIT; cryogenics company	Ph.D. 1987 (thesis in DSpace@MIT, advisor Joseph L. Smith Jr.); co-inventor of the Boreas cycle (1984); co-founded Boreas, Inc. 1988 and served as president; B100 cryocooler R&D 100 award 1994 (MIT News 1995) — verified from MIT primary sources, Sept 2026.	VERIFIED
M.D., UMass · Partner, Hardesty LLC · “CEO eight years, through acquisition”	Not verified **[TBD] — the three items — confirmed or omitted**. Until then the company describes him by the verified line only (the NSF pitch draft already does). Role: advisor, retained; consent confirmed by the founder (15 Oct 2026, S-46 — founder-reported; no separate signed instrument is claimed or on file); on 16 Oct 2026 the founder’s own outreach confirmed that Alan has said yes to being his advisor (S-56); not asked again; the draft to him stays unsent, and no new outreach follows; the three items above remain his to confirm or omit, raised in the founder’s own time.	FOUNDER-CONFIRMED

K&L GATES LLP — PATENT COUNSEL

> *Brian Novak, Ph.D. — Partner in Charge, Irvine. Dennis Majewski — Partner; EE/CE adv. degree; former senior electrical design engineer (semiconductors, quantum circuits, micro sensors).*

Claim	Verification	Status
Engagement	Correspondence on file from Dennis Majewski (29 Sept, 5 Oct 2026) and Trinh Truong, Associate, Irvine (5 Oct 2026); Jason Lee copied. No signed engagement letter or fee-authorization evidence is included in this package.	PARTIAL
Titles and credentials as stated	Novak's precise title and Ph.D. reference to be verified (roster G15); Majewski's signature block reads Partner, Chicago office.	OPEN

NAMED-ROLE CONSENTS

Permission to name advisors publicly was recorded as blocked in September pending written consents. No written consent instrument is on file in this package for any person above; the deck of 13 October names all of them. Chip Story: the wording he wants printed and his written consent are asked of him in the draft to him (not sent); his role is Co-Founder, "cofounder Physicist" by the founder's designation (S-47). Jack Sarfatti (team member) and Alan Crunkleton (advisor): consent confirmed by the founder on 15 Oct 2026 (S-46), and on 16 Oct 2026 the founder confirmed that his own outreach has happened — "they are good with the positions as they are … Jack has stated he is willing and also Alan as said yes to being my advisor" (S-56) — founder-reported, no separate signed instrument claimed; the willingness / role-consent item is closed; not asked again; no consent request is sent and no new outreach follows; their drafts are preserved unsent, and no address lookup is requested. Nothing in that confirmation is a signed agreement or a compensation, IP or employment term. Counsel: consent to be named with exact titles **[Pending: counsel — consent to name K&L Gates, Novak and Majewski]**. **[Pending: consents — D4; Chip's written consent and counsel's]** OPEN — D4
