Energy Wave

CONFIDENTIAL — DRAFT — FOR DISCUSSION · TIME-CRITICAL: COMPETITION CLOSES 19 OCT 2026 21:00 UTC

What was submitted, when, and what has been approved since.

Stated exactly as the record stands.

This page describes a government competition entry as it was observed, not as the company would like it to read. Everything below is dated: the 9 October record in §1–2, and a read-only observation of the live profile on 14 October in §3.

1 · THE SUBMISSION

Item	Record	Status
Competition	U.S. Army xTech Search 10, Round 1 concept white paper. First-place prize $200,000 — a prize, not a grant or capital raised; a CAGE code is required for payment, not for entry.	VERIFIED
Submitted	“Submission Complete” observed ~07:33 UTC, 9 Oct 2026; Valid Eval “Submission Successful” email received 07:33:46Z. Application reference 3b2a54ce-1bac-4a62-8331-ebfb6516b088. The coordinating assistant did not click Submit; the final confirming actor is not established by the record; the founder’s later belief (14 Oct 2026, S-38) is that his Beacon assistant (“Muse”, beta) submitted it.	VERIFIED
Applicant of record	McLean Capital Development LLC (Wyoming), approved by the founder; EnergyWave is the project name. On 9 October the portal’s Company Name field read “EnergyWave.ai”, which conflicts with the legal applicant; no registered EnergyWave DBA is established by the reviewed evidence.	CORRECTION APPROVED
Paper as submitted	3 pages, 123,881 bytes, SHA-256 1000d0c2e58132597aee2678bccc68bd12cae8633f93e296286f55b453a64675. Cover still reads “PRIVATE REVIEW - NOT FOR SUBMISSION”; six cover fields TBD (Location; Number of Employees; Previous DoW Business; Capital Raised Total; Secondary Contact Name; Secondary Contact Email). Pages 2–3 clean. Title: “Independent Evaluation of Nanoscale Energy Conversion Claims for Army Sustainment”; TRL 2, self-assessed.	CORRECTION APPROVED
Logo artifact	energywave-logo-300x300.png, 111,652 bytes, SHA-256 94535df7…c29; inspected, no defect.	VERIFIED
Primary contact	Ian Franklin McLean, ian@mcleancompanies.com (selected by the founder for this application).	VERIFIED
Secondary contact	“Chip] Story”, Co-Founder, crstory@sbcglobal.net — typo; consent and role not independently established; team-member acceptance not visible at submission.	CORRECTION APPROVED
Tags	16 selected against a displayed limit of six.	CORRECTION APPROVED
Previous DoD business	Entered “Yes” with an aedan.io / Instagram link — not an award.	CORRECTION APPROVED: NO

Item	Record	Status
Employees / capitalization	4 / $0 outside debt or equity, founders excluded.	ENTERED, UNVERIFIED
IP ownership / Work Ownership / UEI / CAGE	N/A / unanswered / blank / blank — none required for entry.	ENTERED
Address	P.O. Box 8646, Newport Beach, CA 92658 — a mailing address.	ENTERED

2 · CORRECTIONS THE FOUNDER APPROVED ON 9 OCTOBER 2026 (~16:37 UTC)

#	Approved change	Execution
1	Company Name → McLean Capital Development LLC; EnergyWave remains the project name; no DBA claimed.	**Not executed as of 16:42 UTC, 9 Oct** — browser control was unavailable to the assistant preparing the change. **Observed 14 Oct (§3):** items 1–4 present in the live profile; item 7 preserved at 0; item 5 — the replacement filename is shown at a new artifact link, bytes not verified; item 6 — not confirmed. Who applied the changes, and when, is not established by the record; on 14 Oct 2026 the founder said “Beacon submitted I believe this is muse by beta” — his assistant application, stated as a belief rather than a record (S-38). PARTIALLY CLOSED — D7
2	Previous DoD business → **No**; clear the aedan.io / Instagram entry. (Founder: the LLC has held no DoD contract or award.)	
3	Secondary first name “Chip]” → “Chip”.	
4	Tags → exactly six: Sensing; Engineering-Other; Power Generation and Management; Quantum Technologies; Computation; Data Visualization and Synthetic Environments.	
5	Replace the uploaded paper with the corrected three-page PDF “McLean Capital Development LLC_xTech_Search10_White_Paper.pdf”, 123,643 bytes, SHA-256 90823d623fb4194eda74ca3560862004254c47a3af851f87987314aa8ca4fea1 — banner and TBDs removed, scientific pages unchanged.	
6	Cover “Capital Raised Total” → approximately USD 10,000 including founder contributions.	
7	Portal capitalization field stays $0 outside debt / equity (founders excluded); other entered facts preserved; no certification toggled.	

3 · CURRENT PROFILE STATE — READ-ONLY OBSERVATION, 14 OCTOBER 2026, 18:12–18:20 PT (15 OCT 01:12–01:20 UTC)

Field	Observed value	Against the approved corrections
Company Name	McLean Capital Development LLC	Item 1 — applied
Previous DoD business	No	Item 2 — applied
Secondary contact	Chip Story, Co-Founder (the field is not proof of role or consent)	Item 3 — applied
Tags	Exactly six: Computation; Data Visualization and Synthetic Environments; Engineering-Other; Power Generation and Management; Quantum Technologies; Sensing	Item 4 — applied
Materials submitted for evaluation	“McLeanCapitalDevelopmentLLC_xTech_Search10_White_Paper.pdf” at artifact 262231 (the 9-Oct attachment was artifact 262204). A read-only download attempt timed out: **the attachment’s bytes and its cover values are not verified**.	Item 5 — filename observed, identity unverified · Item 6 — not confirmed

Field	Observed value	Against the approved corrections
Company capitalization	0 (the field excludes founders)	Item 7 — preserved
Employees · UEI · CAGE · IP ownership · Work ownership	4 · blank · blank · N/A · neither selected	unchanged
Logo	energywave-logo-300x300.png, artifact 262203	unchanged

Observed by the GPT reviewer from the authenticated profile's accessibility tree; no field, upload, save, submission or certification was changed. The observation does not establish who made the intervening changes, when, or which version the evaluators hold.

4 · WHAT THE PAPER PROPOSES

An independent measurement platform to evaluate nanoscale energy-conversion claims before they drive Army power-system investment. First candidate: a published metal–insulator–metal diode and Casimir-cavity experiment (Moddel et al. 2021, 1.4 pW maximum, attributed to its authors; Maclay 2024 critique), tested beside matched controls under pre-declared criteria with guarded electrical measurement, artifact tests and thermal bounds. A concept-stage evaluation capability, not a power-source offering; a null result is an expected, useful outcome. Independent laboratory execution and a qualified technical lead are planned and not secured. A possible six-month feasibility sequence is described, gated on people, access and quotes.

5 · FOR THE READER

- The entry was made by an existing Wyoming LLC that the founder wholly owns; EnergyWave, Inc. was not formed at submission. Nothing in the entry should be read as a statement about EnergyWave, Inc.'s eligibility.
- Submitted and observed values are observations of what was entered, not independent verification of the underlying facts.
- The paper as submitted (SHA-256 1000d0c2…4675) and the founder-approved replacement (90823d62…fea1) are placed in this folder as exact copies of the local record. Whether the portal's current attachment is byte-identical to the replacement is not verified.
