Energy Wave

energywave.ai • Due Diligence — Reading Guide
15 October 2026 · DD-2026-10-15-r5.7-draft

CONFIDENTIAL — DRAFT — FOR DISCUSSION · NOT RELEASED

How to read this package. What is verified, what is open, and in what order.

EnergyWave is an early-stage research venture. This package is built so that a careful reader can tell, on every page, which statements rest on documents, which rest on a dated communication, and which are decisions not yet taken. Nothing here claims that a device exists, works, or will work.

THE ONE RULE THAT GOVERNS EVERY PAGE

> **Two questions.** Every claim the company examines must answer both: *what is the net energy source — and where is the colder sink?* A claim that cannot answer them is documented and set down. The mainstream prior on the underlying physics is “no”, and the program is designed to find that out cheaply and publish it either way.

STATUS MARKS USED THROUGHOUT

Mark	Meaning
ORIGINAL	An unedited original placed byte-for-byte, its SHA-256 recorded in the manifest and the source ledger. The file’s identity is verified; the statements inside it are not re-verified by placement.
VERIFIED	A specific statement supported by a located document whose identity (SHA-256) is recorded in the source ledger, or by a dated original communication read in full.
OPEN	A fact not yet established, or a decision that belongs to the founder, counsel, or a named person. Silence does not close it.
HISTORICAL	An earlier document retained unedited for provenance. Where it conflicts with a later document, the later one governs and the conflict is named.
DRAFT	Written for this package from the sources named at the foot of the page; not yet reviewed by counsel or approved for circulation.
[TBD] — …	The founder’s marker — “make the TBD in brackets [TBD] and in orange ink” (15 Oct 2026) — for a current amount, term, role or detail not yet determined; the bracketed [TBD] is always printed in orange ink. It identifies an unresolved field; it does not establish a term, result, agreement or submission clearance, and no further question is asked of the founder about it. Written into the document where the value belongs and listed once in the register (*Open Items Register*, root; NEEDS_INPUT.md). Never a blank or a guess.
[Pending: …]	Evidence, consent or an action owed by a named party other than a founder decision — counsel’s docket or answers, a person’s written consent, the xTech attachment check. “On hold” inside the marker records an express instruction not to act.

READ FIRST, WHOEVER YOU ARE

EnergyWave_Open_Items_Register_2026-10-15.pdf (NEEDS_INPUT.md) — the founder’s 15 October decisions as applied, every [TBD] field and pending item in one list, by owner, with the one time-critical item first.

A reader who knows what is open reads everything else correctly.

AUDIENCES AND TARGETS — THE FOUNDER'S DIRECTION OF 15 OCTOBER 2026 (LEDGER S-44)

Stage	Audience, as the founder states it
Capital Readiness	Close friends, family and angel investment groups; may be combined with the Seed Round (combined structure [TBD]). The three-stage folder structure stands.
Seed Round	Founder's example: Conviction.
Series A	Founder's example: groups such as Sequoia Capital.
Government and national security	IQT (In-Q-Tel, Inc. — a strategic-investment platform, not a grant program), DOE, DoW, DARPA.

Every name above is a founder-selected target — not a relationship, endorsement, commitment, invitation or confirmed open opportunity. The exact opportunity, recipient and format are [TBD]. Nothing in this package is addressed to any of them.

READING ORDER — INVESTORS

#	Document	Status	What it answers
1	EnergyWave_Deck_2026-10-13.pdf (13 slides)	ORIGINAL	The thesis, the problem, the first research module, the structure, the ask, the team.
2	EnergyWave_OnePager_2026-10-13.pdf	ORIGINAL	The same on one page.
3	EnergyWave_Claims_Discipline_2026-10-15.pdf	DRAFT	How every number and every third-party result is labelled.
4	EnergyWave_Capital_Readiness_Terms_and_Objectives_2026-10-15.pdf · EnergyWave_SAFE_Term_Summary_DRAFT_2026-10-15.pdf	DRAFT	What the Oct-13 materials proposed ($60,000 SAFE, three months) and what is now [TBD] — no SAFE executed, no funding raised (founder, 15 Oct 2026); what "capital-ready" means; the SAFE page kept as a prospective template with every unset term [TBD].

#	Document	Status	What it answers
5	03_Technical_Documents/EnergyWave_Research_Program_and_Gates_2026-10-15.pdf	DRAFT	The gate protocol, the research threads, the eight commitments.
6	05_Team/EnergyWave_Team_and_Counsel_2026-10-15.pdf	DRAFT	Every person on the deck, with the verification status of each credential.
7	04_Legal_and_IP/EnergyWave_Entity_IP_and_Legal_Status_2026-10-15.pdf	DRAFT	Entities as they stand, the provisional filing, counsel's dated statements, agreements that bear on IP.
8	02_Seed_Round/EnergyWave_Seed_Deck_DRAFT_2026-10-15.pdf (16 slides) and EnergyWave_Seed_OnePager_DRAFT_2026-10-15.pdf; 03_Series_A/EnergyWave_Series_A_Readiness_Outline_DRAFT_2026-10-15.pdf	DRAFT	The rounds the bridge is designed to reach: the seed deck and one-pager with amounts and terms [TBD] and the September model's figures labelled as a historical scenario; the Seed Round Technical Docs page (02_Seed_Round) — the technical hub: document set, evidence status, operating requirements pending the quote register; what a Series A reader will expect and what exists.

READING ORDER — DEPARTMENT OF WAR REVIEWERS

#	Document	Status	What it answers
1	02_DoW/EnergyWave_Applicant_and_Eligibility_Facts_2026-10-15.pdf	DRAFT	Who the applicant of record is, and each eligibility fact with its status.

#	Document	Status	What it answers
2	02_DoW/EnergyWave_xTech_Search10_Submission_Record_2026-10-15.pdf	DRAFT	Exactly what was submitted to xTech Search 10, when, and what corrections were approved.
3	02_DoW/EnergyWave_xTech_Search10_Paper_AS_SUBMITTED_2026-10-09.pdf and …_APPROVED_REPLACEMENT_2026-10-09.pdf	ORIGINAL	The three-page paper exactly as submitted on 9 October, and the founder-approved replacement; each identified by hash.
4	02_DoW/EnergyWave_Compartmentalization_AT_Posture_v0.1_2026-09-12.pdf	ORIGINAL	How know-how and any future hardware would be protected — CPI/AT vocabulary, pre-device.
5	02_DoW/EnergyWave_DoW_White_Paper_v2.1_DRAFT_2026-10-15.pdf	DRAFT	The v2.1 pass of the August paper for Department of War use: entity, contact, thread lead and team inputs tagged; sources verified.
6	02_DoW/EnergyWave_Safe_Release_Posture_DRAFT_2026-10-15.pdf	DRAFT	If a high-density power source ever exists, how it ships: control and safety architecture, negative scope, a release roadmap contingent on the gates. Supersedes the August 2025 paper, whose device figures are withdrawn.
7	02_DoW/EnergyWave_DoD_White_Paper_v2.0_2026-08.pdf	HISTORICAL	The August 2026 technical-review paper. Predates the October materials; names people and a protocol in earlier wording.
8	03_Technical_Documents/ and 04_Legal_and_IP/	—	Shared with the investor package. The Thread A Characterization Plan, the Humanoid Power Budget Specification and the Measurement Platform Error Budget are drafts with inventor-defined inputs tagged.

WHAT A DILIGENT READER WILL FIND, STATED FIRST

- **Entity status.** The deck names EnergyWave, Inc. (Delaware C-corp). The founder stated on 14 October 2026 that it is not formed (ledger S-38); K&L Gates is handling the entity work (founder, 15 Oct 2026), and no certificate is in the package. No SAFE has been executed and no funding has been raised (founder, 15 Oct 2026); the 9 Oct ≈ $10,000 record stands as a dated statement, reconciliation **[TBD]**. The xTech applicant of record is a different, existing entity — McLean Capital Development LLC (Wyoming). OPEN
- **Credentials and consents.** Bios are reproduced from the deck. Three items on one advisor's line and the exact wording of the founder's degree are not yet verified; no written consent instrument is on file for anyone; Jack Sarfatti's role (team member, not advisor) and Alan Crunkleton's (advisor) are confirmed by the founder, 15 Oct 2026 — founder-reported, no outreach authorized. The current core team is Ian McLean and Chip Story (Co-Founder, physicist by the founder's designation); Mike Wentz (after Capital Readiness, title **[TBD]**) and Arath Acosta (proposed Design Engineer from Seed) are planned roles, not hires. OPEN
- **Which research module is first — answered.** Sweet solid-state is the lead research path (founder, 15 Oct 2026). The September program documents made independent replication of Moddel et al. (2021) the Gate-1 anchor with the founder's own structure as a third workstream, and the xTech paper proposes that replication (thread B) as an evaluation capability on the measurement platform (thread C); the Research Program page keeps the three as distinct workstreams under one protocol. The specimen, conditioning, bench order and measurement lead are **[TBD]**. ANSWERED 15 OCT · DETAILS [TBD]
- **Positioning language.** The September claims charter barred the phrase "the power supply for …", the naming of the first module and the naming of advisors; the October deck does all three. Which rule set governs is **[TBD]** (founder, 15 Oct 2026: keep as is; no further question asked); meanwhile the Oct-13 positioning stands as the approved materials and the difference is recorded. [TBD] — D10

INTERNAL FOLDERS

90_Internal_Ops_NOT_FOR_CIRCULATION/ holds the consent requests, the counsel question set, the xTech verification checklist and the mirror instructions — drafts and checklists; nothing is sent by the package. 99_Source_Archive/ holds pointers and hashes, not copies. src/ holds the page and slide sources and the renderer so any document can be regenerated and diffed. tools/ holds the manifest and forbidden-label controls. MANIFEST.md lists every file in this release with its SHA-256; a mirror is valid only when it verifies against that manifest. SOURCE_LEDGER.md §F records the legacy QVE-era sources, read and never placed.

Sources: SOURCE_LEDGER.md (S-01, S-02, M-10, M-11, M-18, M-19, §F); DECISIONS.md (D2, D3, D4, D7, D10, D11); NEEDS_INPUT.md; founder decisions of 15 Oct 2026 (S-44); target-source notes (S-45). Contact for new documents: the address the founder designates (DECISIONS.md D5); historical and submitted records keep their own.
