Energy Wave

CONFIDENTIAL — DRAFT — FOR DISCUSSION · 34 ITEMS · SILENCE NEVER CLOSES A SUBSTANTIVE ITEM

Everything that is waiting on an answer. Who answers it, and where the answer lands.

Every document in this package is complete except for the facts and decisions that belong to the founder, the co-founder, counsel or a named person — and the reviewer corrections still being applied, which are dispositioned finding by finding in MANIFEST.md, separately from this list. Each of those is marked in the document itself with the literal, searchable text **[Needs Input from Ian or Chip: …]** (or *from counsel via Ian*), and listed here once. The founder's answers of 14 October 2026 (ledger S-38 — not formed; GovThink not filed; ian@energywave.ai; Beacon submitted, as a belief; "no patents have been filed", read with the 2025 provisional record) are already applied, so this list asks only what is still open. Reply with the item number and the answer; the lead fills the tag, re-renders the page and re-pins the release. The same list is kept as **NEEDS_INPUT.md** at the root of the package.

> **One item is time-critical:** T-1, the xTech Search 10 attachment, before Monday 19 October 2026, 21:00 UTC. Everything else is gated by circulation, not by a clock.

0 · TIME-CRITICAL — BEFORE MONDAY 19 OCTOBER 2026, 21:00 UTC (2:00 PM PACIFIC)

The xTech Search 10 portal is editable until the close. Nothing on the portal is changed by this package.

#	Input needed	Where it lands	Who
T-1	Verify the current xTech attachment (artifact 262231): download it, hash it (expected 90823d62…fea1, 123,643 bytes), confirm the cover reads ≈ USD 10,000 under Capital Raised Total with no private-review banner and no TBD fields; re-upload the approved replacement if not. Report the hash and time you saw. On 14 Oct you said "Beacon submitted I believe this is muse by beta" — confirm or correct that, say who applied the 9–14 Oct changes and when, and whether the evaluators' frozen version is known.	90_Internal_Ops_NOT_FOR_CIRCULATION/2026-10-15_xtech-attachment-verification_checklist.md; D7; xTech Submission Record §3	Ian

A · DECISIONS THAT GATE CIRCULATION (DECISIONS.MD)

Reply "D2 …", "D3 …" with the answer. Your 14 Oct answers (ledger S-38) are applied; what follows is only what is still open.

#	Input needed	Where it lands	Who
D2	In plain words, since "ask beacon" was the 14 Oct answer: (1) when an investor or a Department of War reader asks what the company tests first, is it the Sweet solid-state module on the deck (thread A), the Moddel-replication on the xTech paper (thread B), or the measurement platform (thread C)? (2) Is the Sweet module on the deck the same device the website calls "a mid-1980s solid-state design"? (3) Which runs first on the shared bench, A or B? If Beacon answers, its answer is relayed here and stands only once you confirm it.	Research Program and Gates; Seed Deck slide 6; DoW White Paper v2.1 §3.2; Thread A Characterization Plan	Ian or Chip (Beacon's answer relayed, then confirmed)

#	Input needed	Where it lands	Who
D3	Answered 14 Oct: EnergyWave, Inc. is not formed; GovThink is not filed and has no formal tie. Still needed: counsel's four confirmations (sole shareholder / cap table at formation; CEO, Secretary, CFO; shares authorized, issued, reserved; C-corp rationale as drafted); the certificate and file number when formed; whether a pre-seed SAFE already exists, and on what terms; the current patent docket from counsel — your "no patents have been filed" does not alter the documented 27 Feb 2025 provisional; its scope and any later filing stay unconfirmed until counsel pulls the docket.	SAFE Term Summary; Seed Deck slide 5; DoW White Paper v2.1 §1; Safe Release Posture §8; Applicant and Eligibility Facts; counsel question set A–B	Ian; counsel
D4	Credentials and consents: the exact wording of your UC Irvine degree from a diploma or transcript; Crunkleton's M.D. (UMass), Hardesty partnership and "CEO eight years, through acquisition" — confirm or omit; written consent to be named for Story, Sarfatti, Crunkleton, Novak and Majewski — Chip's information is complete from your side (15 Oct); the wording he wants printed and his signature are asked of him in the draft to him (new copies omit Sarfatti's advisor label per your direction; the Oct-13 deck's title stays quoted on the Team page as history; consent attaches to the wording actually used); Mike Wentz's role, verified credentials and consent, or confirm his omission.	Team and Counsel; Seed Deck slide 11; Seed One-Pager; DoW White Paper v2.1 §6; Safe Release Posture §8; consent-request drafts	Ian or Chip; each named person
D5	Contact resolved 14 Oct: ian@energywave.ai, which forwards to ian@mcleancompanies.com — applied on every new page and the three consent drafts. Still needed: the registered or mailing address for EnergyWave letterhead; and whether you can send as ian@energywave.ai (only incoming forwarding is confirmed) — until then the drafts go from the mailbox you use, with ian@energywave.ai as reply-to.	Safe Release Posture letterhead; DoW White Paper v2.1 header	Ian
D7	See T-1.	—	Ian
D8	Confirm the canonical AT-posture memo build (AT-PDF-1, 2b08379a…) and the canonical physics-briefing build (PB-2, b65ddf5a…).	02_DoW; 03_Technical_Documents	Ian
D9	Resolved 14 Oct: Documents / EnergyWave Final, with matching OneDrive and My Drive copies. Execution after review, not a question for you: GPT/Lyra places each reviewed release in its own folder beside the r4.1 snapshot in the three copies, verifies it against the pin, and fills the nine audience folders from DELIVERY_MAP.md.	90_Internal_Ops_NOT_FOR_CIRCULATION/2026-10-15_mirror-instructions.md; DELIVERY_MAP.md	GPT/Lyra (mirror writes)
D10	Which claims rule set governs going forward — the September charter (no "power supply for …" tagline, no named first module, no named advisors before consent) or the October deck. The Seed deck and one-pager follow the deck's positioning and are marked so.	Claims Discipline; Seed Deck slides 1–2; Seed One-Pager	Ian

#	Input needed	Where it lands	Who
D11	Legacy documents and the people named in them (ledger §F): was the August 2025 paper “Safely Powering AI Robots with QVED” sent to any office, investor or advisor — to whom and when — so a written supersession note can follow; the status of the Dave Rossi relationship (the October 2024 scope-of-work proposal: any payment, deliverable or agreement; any claim on EnergyWave IP); was the 2024 “GPT Content” text ever published on energywave.ai or sent to anyone.	SOURCE_LEDGER.md L-04, L-09, L-14; Safe Release Posture status box; counsel question set	Ian; counsel

B · INPUTS BY DOCUMENT — THE LITERAL TAGS, WHERE EACH ONE SITS

Each line is the text that appears in the document, so it can be found by search and replaced by the answer.

#	Input needed	Where it lands	Who
B-1	SAFE Term Summary — SAFE form (post- or pre-money; standard or counsel’s); valuation cap or “uncapped”; discount or “none”; MFN yes / no; pro rata side letter yes / no; named investor(s) and accredited-investor basis; information-rights letter yes / no; officer title on formation; whether a prior SAFE exists and its terms.	01_Investor/01_Capital_Readiness/EnergyWave_SAFE_Term_Summary_DRAFT_2026-10-15.pdf	Ian or Chip; counsel for 506(b)/(c)
B-2	Seed Round — the seed amount; Tranche A, B and C amounts; priced equity or SAFE, and the pre-money; validated raise-model inputs or a named finance owner (founder salary, engineer bases, rent, build-out, instrumentation, additive-manufacturing system, insurance, recruiting, the $500k-each question); consents (D4). Counsel: escrow structure; 506(b) or 506(c). The model’s stored figures remain placeholder outputs, not approved targets.	EnergyWave_Seed_Deck_DRAFT_2026-10-15.pdf slides 6, 8, 9, 11, 14, 15; EnergyWave_Seed_OnePager_DRAFT_2026-10-15.pdf; Seed Round Structure	Ian or Chip; counsel
B-3	Series A — the cap table file (v1.1 DRAFT, 11 Sept 2026) or confirmation it must be rebuilt from the model; the 13-slide Series A deck file or confirmation it must be rebuilt; which entity’s books constitute the historical financials; validated inputs or a finance owner.	01_Investor/03_Series_A/EnergyWave_Series_A_Readiness_Outline_DRAFT_2026-10-15.pdf	Ian or Chip
B-4	Thread A characterization — the actual core (material, grade, supplier, lot) or approval of the off-the-shelf baseline; geometry, magnetization direction and state, winding axis relative to magnetization; winding specification if the original differs; the conditioning procedure, its intended physical state change and the energy delivered during conditioning; the founder’s notes, drawings and any prior measurements for the pre-registration appendix; whether the Sweet module and the website’s design are the same device; the measurement lead who signs the specimen record, and the laboratory; whether A or B runs first (D2).	03_Technical_Documents/EnergyWave_Thread_A_Characterization_Plan_DRAFT_2026-10-15.pdf	Ian or Chip (inventor-defined)
B-5	Humanoid power budget — which humanoid, or a generic class; target platform mass and bay volume; shift length and duty profile; allowable heat rejection; the six subsystem rows of the worksheet (sight and sound, smell and taste, touch, motion, compute, thermal / overhead); the resulting P̄, Ppeak and ramp rate.	03_Technical_Documents/EnergyWave_Humanoid_Power_Budget_Specification_DRAFT_2026-10-15.pdf	Ian or Chip

#	Input needed	Where it lands	Who
B-6	Measurement-platform error budget — the thread A effect size the plan must resolve; the calorimetric resolution the program will fund; the thread C lead (name, or “to hire — a Tranche A condition”); the measurement lead (name, or “to hire”). The 0.14 pW floor is this plan’s proposed target, ratified at commissioning.	03_Technical_Documents/EnergyWave_Measurement_Platform_Error_Budget_DRAFT_2026-10-15.pdf	Ian or Chip; thread C lead
B-7	DoW White Paper v2.1 — confirm McLean Capital Development LLC as the issuing entity while EnergyWave, Inc. is unformed; a primary source for “56 % of BOM; 28 body plus 50 hand actuators” or omit the figures; which thread leads for the Department of War (D2); your degree wording; Crunkleton’s three items; Mike Wentz’s role, credentials and consent, or confirm omission.	02_DoW/EnergyWave_DoW_White_Paper_v2.1_DRAFT_2026-10-15.pdf	Ian or Chip
B-8	Safe Release Posture — whether the August 2025 paper was sent, to whom and when (D11); written consents (D4); the letterhead address (D5).	02_DoW/EnergyWave_Safe_Release_Posture_DRAFT_2026-10-15.pdf	Ian or Chip
B-9	Legacy sources — the QVE Engine folder on the Mac: drag it into the Drive My Mac folder beside EnergyWave, or connect the Mac through Desktop Commander, so it can be inventoried; the Rossi relationship and the 2024 GPT-content text (D11); SHA-256 of each §F file from the Mac (shasum -a 256), since the Drive connector returns text, not bytes.	SOURCE_LEDGER.md §D and §F	Ian; Antigravity for the hashes
B-10	Internal-ops drafts — recipients’ addresses on file for Sarfatti and Crunkleton; proposed co-founder terms for Chip Story, or “counsel to propose”; for the counsel question set: sole shareholder / cap table at formation, officer names and titles, shares authorized / issued / reserved, the invention-record return date, and the three ALG documents to attach. Every draft goes to Grok for its per-email review before you send it from the mailbox you use (reply-to ian@energywave.ai).	90_Internal_Ops_NOT_FOR_CIRCULATION/	Ian or Chip; Grok (review)
B-11	Mirrors and project — GPT/Lyra places and verifies reviewed releases in the three copies; upload manifest.json, MANIFEST.md and the twenty rendered documents to the *EnergyWave Ops* Claude Project, or give the assistant project-knowledge access.	2026-10-15_mirror-instructions.md; README release table; ledger S-33, S-34	Ian; Antigravity or Lyra
B-12	Seed Round Technical Docs — once GPT/Codex’s operating-requirements and quote register arrives: confirm the target site near UC Irvine, the laboratory footprint and the first two hires (PI at Tranche A; technician); the register itself supplies dated quotes and listings, and no facility, bench, headcount or cost figure is stated until it does.	01_Investor/02_Seed_Round/EnergyWave_Seed_Round_Technical_Docs_DRAFT_2026-10-15.pdf; ledger S-43	Ian or Chip; GPT/Codex (register)

C · FOR COUNSEL, THROUGH IAN (K&L GATES)

Drafted as one consolidated question set so that nothing is asked twice; not sent.

#	Input needed	Where it lands	Who
C-1	Securities: Rule 506(b) or 506(c) for the $60,000 SAFE and for the seed round — no deck reaches an investor who has not heard from the company first until answered; escrow structure for Tranches B and C; any CFIUS / FIRRMA consideration.	counsel question set §C; SAFE Term Summary; Seed Deck slide 14	counsel

#	Input needed	Where it lands	Who
C-2	Formation: the four confirmations; the 1988 Delaware “EnergyWave Inc.” #2149394; the filing itself (the founder says the entity is not formed as of 14 Oct), then the certificate and file number.	counsel question set §A; Legal page §1	counsel
C-3	Patent: the current Patent Center docket for 63/763,998 and any later filing; the coversheet provisional in the inventors’ names and what “some app and claim prep” covers; the ALG IP Assignment (Exhibit A, blank signature line), the July 2025 NDA and the Integrated Protective Rider reviewed against the EnergyWave work; assignment of energywave.ai and existing work product on formation; a freedom-to-operate note on the Haisch–Moddel / Jovion patents given the 2024 positioning (ledger L-04) and thread B.	counsel question set §B; Legal page §§2–4	counsel
C-4	People and naming: consent to name K&L Gates, Novak and Majewski with their exact titles; advisor agreements; consents to be named; a 409A before any option grant.	counsel question set §E; Team and Counsel	counsel
C-5	Security posture: the AT-posture memo’s §8 questions (trade-secret program; patent versus trade secret by compartment; Invention Secrecy Act exposure; export classification and deemed exports; CPI / AT obligations under federal funding; NDAs and departure procedures).	counsel question set §F; Compartmentalization & AT Posture v0.1 §8	counsel

D · FOR THE REVIEWERS (GPT / LYRA, ANTIGRAVITY, GROK, GEMINI / ARGON)

GPT/Lyra audited r5 (S-39) and delta-checked r5.2 (S-40); each later release gets its own delta check against its pin.

#	Input needed	Where it lands	Who
R-1	Delta-check the current release from the commit and pin in the handoff, per REVIEW_PROTOCOL.md; the slide deck is 16:9 and carries its own footer line on each slide instead of the portrait running header.	REVIEW_PROTOCOL.md	Lyra; Antigravity
R-2	Hash the §F legacy files on the Mac and send the list.	SOURCE_LEDGER.md §F, S-33, S-34; mirror instructions	Antigravity
R-3	Re-review of the four email drafts in 90_Internal_Ops after each revision — a prior verdict is not clearance of a revised draft; verdicts recorded in that folder; none sent.	90_Internal_Ops README	Grok (Architect, Compliance)
R-4	Assemble the nine audience folders of the EnergyWave Final collection from DELIVERY_MAP.md after review — copies only, hash-checked against MANIFEST.md, nothing marked DRAFT or INTERNAL — then rebuild the collection’s FILE_MANIFEST.json; one writer at a time.	DELIVERY_MAP.md; mirror instructions §5	GPT/Lyra

E · WHAT CLOSES WITHOUT FURTHER INPUT, ONCE THE ANSWERS ARRIVE

Held by the lead; listed so the sequence is visible.

#	Input needed	Where it lands	Who
E-1	Fill the answered tags, re-render the affected pages, bump the version, rebuild the manifest, commit, push, and hand the new pin to the reviewers.	—	Claude
E-2	Draft the supersession note for any recipient of the August 2025 paper (D11); draft the Series A files when the cap table and deck are located or rebuilt (B-3); place the QVE Engine inventory in the ledger (B-9).	—	Claude
E-3	Fold Beacon’s D2 answer, once the founder confirms it, into the Research Program page, the Seed deck and the DoW white paper, and update DELIVERY_MAP.md as items move from DRAFT to READY.	—	Claude

Sources: the tagged pages in src/pages/ (10–19); DECISIONS.md D2–D11; SOURCE_LEDGER.md §D, §F, S-36–S-41; 90_Internal_Ops_NOT_FOR_CIRCULATION/; DELIVERY_MAP.md; REVIEW_PROTOCOL.md. This register is generated from the tags; a tag that is not here is a finding.
